PROFESSIONAL SUMMARY

Software Engineer with 9+ years of experience building banking and enterprise applications. From 2021 to 2026 I led Angular development and the Leonus Digital Banking project at ABC TECH Group, shipped native Android features in Kotlin and Jetpack Compose, and owned the GitLab CI/CD pipelines for both platforms. Strong in Angular, TypeScript and RxJS, with full stack experience in Java/Spring Boot and PHP.

PROFESSIONAL EXPERIENCE

ABC TECH Group | **Software Development Engineer** — Mar 2021 – Oct 2026 · Tuzla

- Led the Leonus Digital Banking project: Angular internet banking delivered to multiple banking partners (Partner banka, Gorenjska banka, CROBA, Slatinska banka).
- Organized team work across all delivery phases and set up processes for quality control, release planning and task allocation, coordinating development, production and QA.
- Built UI features, complex form flows, validations and backend API integrations.
- Shipped native Android features in Kotlin and Jetpack Compose in a modular, multi-feature banking app, using AI-assisted development for implementation and code review.
- Built and maintained the GitLab CI/CD pipelines for the Angular and Android apps: environment-specific builds, tag-driven versioning, artifact distribution and merge-request quality gates (static analysis, linting, unit tests).
- Hardened Android release builds with R8/ProGuard, per-environment configuration and signing, fixing distribution crashes caused by missing build-time configuration.

Stack: Angular, TypeScript, RxJS, NgRx, Kotlin, Jetpack Compose, GitLab CI/CD

Habultron d.o.o. | **Software Development Engineer** — Apr 2019 – Dec 2020 · Tuzla

- Built and maintained production web applications with Angular on the front end and PHP (CodeIgniter) with MySQL on the back end.
- Delivered new features, bug fixes and ongoing maintenance.

Bicom Systems | **Deployment & Training Engineer** — Oct 2018 – Feb 2019 · Tuzla

- Deployed and supported VoIP products on Linux, validated releases across desktop and mobile platforms, and trained customers and partners.

Marvelsoft | **Software Development Engineer** · Front-end features in JavaScript, HTML and CSS — Jun 2018 – Sep 2018 · Tuzla

Cape Ann Enterprises | **Programmer** · Client web projects in JavaScript, jQuery and Drupal — Apr 2017 – Jun 2018 · Remote

TECHNICAL SKILLS

Frontend	Angular, TypeScript, RxJS, NgRx, Signals, React, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS
Mobile	Kotlin, Jetpack Compose, Android SDK, R8/ProGuard
Backend & data	Java, Spring Boot, REST APIs, PHP (CodeIgniter), MySQL, PostgreSQL
Delivery	Git, GitLab CI/CD, GitHub Actions, unit testing, linting, code review
Other	Linux, deployment and training, software testing, technical support

EDUCATION

Bachelor's Degree — Engineering Informatics
College of Computer Science and Business Communications
eMPIRICA · 2012 – 2015

CERTIFICATIONS

CCNA — Cisco Certified Network Associate
