PROFESSIONAL SUMMARY

Software Development Engineer with 8+ years of professional experience (2017–present) across product development, enterprise applications, deployment/training, and technical support. Strong focus on Angular and modern web development, with additional expertise in JavaScript, MySQL, PHP, jQuery, and HTML/CSS. Proven track record in full-cycle delivery — from UI feature implementation and API integration through to QA collaboration and customer-facing training.

PROFESSIONAL EXPERIENCE

ABC TECH Group | Software Development Engineer

Mar 2021 – Present • Tuzla, Bosnia and Herzegovina

- Led Angular-based web application development for enterprise-grade products
- Implemented UI features, form flows, validations and backend API integrations
- Delivered native Android features in Kotlin and Jetpack Compose across a modular multi-feature banking app, using AI-assisted development to accelerate implementation and code review
- Built and maintained the GitLab CI/CD pipelines for both the internet banking Angular application and the Android app: automated environment-specific builds, tag-driven versioning, artifact distribution and merge-request quality gates (static analysis, linting, unit tests)
- Hardened Android release builds through R8/ProGuard configuration, per-environment build setup and signing, resolving distribution crashes traced to missing build-time configuration
- Collaborated closely with product and QA teams to deliver enhancements and bug fixes on schedule

Habultron d.o.o. | Software Development Engineer

Apr 2019 – Dec 2020 • Tuzla, Bosnia and Herzegovina

- Developed and maintained web applications using JavaScript, MySQL, CodeIgniter and related technologies
- Contributed to feature development, bug fixing and ongoing maintenance in a production environment

Bicom Systems | Deployment & Training Engineer

Oct 2018 – Feb 2019 • Tuzla, Bosnia and Herzegovina

- Provided technical support for PBXware, Serverware, Telcoware, SIPmon, SIPprot, gloCOM and Communicator via ticketing, live chat and phone
- Installed, configured, troubleshot and maintained Bicom products on Linux-based systems
- Deployed Bicom Systems products for customers and validated bug-fix patches and new releases across Windows, Linux, macOS, iOS and Android
- Delivered product usage training and best-practices sessions to end users and partners

Marvelsoft | Software Development Engineer

Jun 2018 – Sep 2018 • Tuzla, Bosnia and Herzegovina

- Developed front-end features using JavaScript and HTML/CSS
- Contributed to UI implementation and feature development tasks

Cape Ann Enterprises | Programmer

Apr 2017 – Jun 2018 • Remote

- Built and maintained web solutions using JavaScript, jQuery and CMS platforms including Drupal
- Delivered new features and maintained existing codebases across multiple client projects
